HERE IS A GOLD MINE PAYING WELL

Philadelphia - Western Group Meets Heavy Expense by Selling Ores Steadily.

ANOTHER FINE LOT SOLD HERE SATURDAY

Splendid Values and Generous-Sized Veins Are Being Developed Now.

Messrs, Dudley and Christenson, own ers of the control of the Philadelphia-Western property in the Illinois district of Nevada, will leave for the property today to urgo development work along, This property, while a youngster to years, is one of the unique propositions of the Sagebrash state, having made

of the Sagebrash state, having made a record of which the owners well may feel proud. There has been a great deal of work done on the group, but not a share of treasury stock has been disposed of, the mine being able to more than meet all expenses by the shipments to the Salt Lake smelters.

Another car of rich gold ore was being disposed of here on Saturday. The value of the ore ranged between \$250 and \$265 gold per ton, and it came from the work being done in what is termed the west tunnel. This tunnel has penetrated the "roperty for about 490 feet, and it has tapped three parallel voins. The first vein was caught at a vertical depth of 125 feet, and averages four feet in width and \$45 gold per ton, the range of values being between \$40 and \$60 per ton. The second vein was eaught vertically, 180 feet below the surface, and averages twelve feet in width, the gold values ranging from \$15 to \$18 per ton. The third vein was opened vertically 220 feet, and averages five vertically 220 feet, and averages five feet in width. From eighteen inches to two feet of this vein averages \$600 gold per ton, the balance being \$100

Mr. Dudley stated Saturday that on the dumps were between 1200 and 1500 the dumps were between 1200 and 1500 tops of very high-grade ore awaiting enipment. Another dump holds 300 tons of three-ounce gold ore; still another has 500 tons of \$25 to \$30 ore, while two other dumps contain about 100 tons of rock that will assay better than \$20 per ton in gold. There is a sufficient tonnage now demonstrated to allow the company to ship a car every ten days for an indefinite period, and such will be the plan followed. The company is starting a second tunnel from the easter, side of the properly, which will be sent in some 1000 feet. This working will encounter the three veins above mentioned at a vertical depth of from 500 to 700 feet, and splendid results from this work are confidently ex-

Hilltop, as a camp, stated Mr. Dud-ley, was very busy and looking like a ley, was very busy and looking like a true winner. Two stage lines are in operation between the town and Battle Mountain, and many new properties are being placed in shape for active development. The Hilltop property is meeting with fine results and a shipment of fine gold rock is being prepared now. Hilltop promises to hold a generous share of attention during the summer.

DETAILS OF GOLDFIELD CON. DEAL EXPLAINED

Senator Nixon of Nevada, president of the Goldfield Consolidated Mining company, has disposed of his entire interest in that company, amounting to 308,000 shares, at \$7.50 per share, says the Boston News Bureau. He will probably be succeeded in the presidency by his former partner, George Wingfield. Who purchased 108,000 of the 308,000 shares. Mr. Wingfield secared his shares by an exchange of his financial interest in the Palace hotel of San Francisco and in the bunking business of Nixon & Wingfield.

Barney M. Baruch took over the remaining 200,000 shares at \$7.50 per share in cash and distributed this stock among seven different interests in two 50,000-share blocks and five 20,000 share blocks and five 20,000 share blocks. It is understood that in this recent transfer H. C. Frick, Nor-

share in eash and distributed this stock among seven different interests in two 50,000 share blocks and five 20,000 share blocks. It is understood that in this recent transfer H. C. Frick, Norman B. Ream and Horace Harding of C. D. Barnev & Co. participated. This sale was effected about a week ago. The transfer is said to have been made for personal reasons on the part of Senator Nixon, as he was desirons of retiring from the mining business, having made a fortune therein, practically all within the last five years.

The Goldfield Consolidated company is showing record earnings, due in part

is showing record earnings, due in part to the running into rich bonanza ore and the better operation of its new 600 ton mill. Net earnings for March were \$950,000, against \$450,000 in Feb-The company is now carning at rate of about \$3 per share per

FLAGSTAFF LIME IS **ENCOUNTERED IN RAISE**

Consolidated Flagstaff Work Is Reaching a Very Interesting Part of Mine.

That some very significant developnents within a very short time are ogical in the property at Alfa of the Consolidated Flagstaff company, was couched for yesterday by James E. Beyridge, superintendent of the company, who came in from the camp for a Sunday at home. Mr. Beveridge states that he has been raising from the Tom Moore tunnel level, reaching up 250 feet, and drifting is now heing rushed in order to make connections with the old 200 foot level of the property.

The raise has developed that characteristic Flagsisff limestone formation in which all the ores heretofore have occurred, and which was lost above the present working point, showing that the

curred, and which was lost above the present working point, showing that the raise has discovered the other side of the fault. The present point of endeavor, therefore, is extremely promising ground, and it is virgin territory in which ore bodies can and should make at practically any point. Mr. Beveridge is very much pleased with the present situation. the present situation.

RED BUTTE PROPERTIES PROMISE BIG TONNAGE

RED BUTTE, Nev., via Humboldt House, April 10 -- Further investiga-tion of this great district by your reption of this great district by your representative, reveals such immense ore deposits, and covering as it does so large an area, that he feels safe in predicting that it will be one of the great copper camps of the United States. Northwest of the Nevada Anaconda (described in the latest report) and adjoining, lies the Desert View group, seven in number, belonging to George A. Childers. On this group ore appears in over thirty places, and for a distance of over 700 feet along the course of the vein, in the form of childeoeite, bornite and chalcopyrite.

the course of the vein, in the form of chalcocite, bornite and chalcopyrite, which carries surface copper values of from 2 to 25 per cent, silver four to eight ounces and gold from \$1 to \$5. The gangue is 200 feet wide, with small copper veins of from two inches to four feet in width, appearing at intervals across the width of 200 feet, and parallel to the strike of the gaugue Fourteen open cuts, all exposing ore, and a tunnel fifty-five feet in length to crossent this immense vein comprise the development work.

to crossent this immense vein comprise the development work.

North of the Desert View group ad-joining and at fully 1000 feet lower depth, a fine showing of native copper has been opened, a few feet below the surface, in a four-foot vein, which is not 200 feet vertical depth below the level sand of the Black Rock desert.

level sand of the Black Rock desert. The adjoining group of four claims to the north is owned by Mike Blake, and good silver values are obtained with high-grade copper ore.

Continuing north, W. C. Mason, on a low mountain overlooking the Black Rock desert, with a group, has found generous quantities of high-grade float, but the main source of the ore body has not been exposed. A low range of foothills connecting with the desert and about two miles in extent separate and about two miles in extent separate the next group north from Mason's, The ground consists of twelve claims, located by Frank Clark, a young min-ing engineer of Berkeley, Cal, and formerly with the Guggenheim intersts at Copper River, Alaska, Mr. Clark has eight claims located end to lead t

copyrite ore, on which assays have given 20 per cent copper and fifty-one ounces in silver. This vein has been opened up at intervals and proven to be continuous, and ore bearing for 800 feet. From a ten-foot hole several tons of high-grade ore have been ex-tracted. A parallel vein with about the same character of ore occurs about 500 feet lower down.

Baldez, a Mexican, is the proud owner of the next group north, and has a four-foot vein of chalcogue proven

a four-foot vein of chalcocite proven for several hundred feet, and asso-ciated with an immense specular iron

ein. Joe Farela's group, still farther north about five miles, shows much promise, with three separate veins of high-grade chalcocite and tenorite ick oxide) extending through six

Turning to the southeast and about Turning to the southeast and about one mile northeast of Clark's group, De Voc & Curry have another group consisting of five claims on which an immense vein of copper ore appears of nknown width. It occurs in chalcony ite form, and an average assay from crosscut of twenty feet and no wall a crosscut of twenty feet and no wall encountered, gave 6.8 per cent copper, three and six-tenths ounces in silver and 80 cents in gold. Next southeast, Sangdon, Wells, Muscott & Holland have ten claims. Five different veins have been located running in width from one to ten feet with rich copper showing as high as 40 per cent in value. The vein ten feet wide will average 20 per cent copper the full width, Veins of specular iron over 100 feet in width parallel the copper, running in northwesterly and southeasterly direction.

Adjoining Langdon and associates to the southeast, Anderson, Holcomb, Mo-rin and Cornwall, with their six Black Hawles, are confident they have a black Hawle, are connect they have a bounded. Two separate assays from a three and a half foot vein average gives values of \$51.60 and \$16.20 gross contents; separate values, No. 1 gold, \$15; silver, \$12.60; copper, 10 per cent; gold, \$12; silver, \$10.20 and cop-

per, 10 per cent.

The next report will take in a different character of ores, occurring about four miles southeast of the above described properly, but embraced in the Red Butte district.

Ore Shipments.

The Pioneer sampler on Saturday re-used 2 cars of ore from Utah and I from Arizona camps.

The Taylor & Brunton Co. released 10 cars from Utali camps.

WEEK OF LIQUIDATION CLOSES ON EXCHANGE

There were no very distinctive features in the trading yesterday on the local exchange, and a quiet week was brought to a close. It was a week of severe liquidation, and for that reason there are those who profess to believe that the new week will see a general stiffening of prices. Saturday morning \$4.710 shares of stock sold, representing a market value of \$53,-670.12, bringing the week's totals to 768,-721 shares of stock sold, valued at \$491. 971.95. The following were the closing unlisted and listed stock transactions:

BIG PEOPLE TAKE COPPER PROPERTY

Inspiration Company Backed by Strong Interests in Eastern Financial Circles.

STOCK PLACED ON THE NEW YORK CURB

Thompson Interests Take Up United States People Instead of Guggenheims.

About the only interesting item that aade its way across the Pollock wire system from New York Saturday was he announcement that the Inspiration Copper company had made arrangements by which the stock will be dealt in, beginning with Monday morning. on the New York curb. This company owns several fine properties adjoining the Miami at Globe, Ariz., containing the same ore system that distinguishes the Miami, and on which a very energetic campaign of development work on a large scale is now well under way.

The officers of the company are as The officers of the company are as follows: William B. Thompson, president; J. G. Hopkins, vice president; William H. Smith, treasurer; H. F. Knoblach, secretary; George E. Gunn, general manager; Henry Krumb, consulting engineer, The directors are William B. Thompson, A. F. Hopkins, J. F. Alvord, Charles A. Corliss, W. B. Smith, J. L. Dooce, J. D. Coplen, E. T. Wilder and A. F. Holden.

Perhaps the first thing that strikes a westerner on reading over this list

a westerner on reading over this list of officials is the association of the Thompson people with those of the United States Smelting, Refining and Mining company. Heretofore, Mr. Thompson and his associates have been very close to the Guaranheim interests. Thompson and his associates have been very close to the Guggenheim interests, for Mr. Thompson is a director in the Camberland Ely, Utah Copper and Nevada Consolidated, all Guggenheim propositions wholly or in good part. A. F. Holden, as is well known, is managing director of the United States Smelting, Refining and Mining company, an organization that supposedly is one of the strongest competitors of the American Smelting and Refining system. The new alignment naturally gives rise to the conclusion that the reported breach between the Thompson reported breach between the Thomp and Guggenheim interests over and Guggenheim interests over the Cumberland Ely company's affixes has not been healed to the extent of giving the American company the swing on the

the American company the swing on the Inspiration, a proposition that promises to become one of the great low-grade red metal producers.

Mr. Gunn is too well known locally to need much in the way of introduction. He managed the Cumberland Ely to a successful basis, and he is now serving the Mason Valley Copper company in a similar capacity and to a like purpose. J. G. Hopkins is president of the Arizona Copper company.

UNCLE SAM GETTING INTO SOME GOOD ORE

When some of the insiders began to fill up on Uncle Sam Consolidated stock on the local exchange Saturday morning, it became apparent imme-diately that something better than usual dintely that something better than usual was taking place in the property. On being asked by The Tribune yesterday morning, John Dern, general manager of the company, stated that the winze being sent into the ore from the original strike level was looking extremely fine, the entire winze being in ore of ever increasing value, and some very good assays had been returned on the ore. Mr. Dern refused to give the assay value of the rock, but report had the silver running anywhere from twenty silver running anywhere from twenty to 2000 ounces. The lead value also is supposed to be high.

It was thought at first that the improved condition was in the drift on the level below the discovery level, but Mr. Dern states that owing to the lack of power, the work of drifting on the lower level had to be abandoned for the time being. The Uncle Sam company has no ore contract at the present time, but it is thought that the officials will begin to arrange soon for the market. begin to arrange soon for the market-ing of a portion of this rich rock.

TEN UNITS OF BOSTON CON. MILL ARE GOING

Visitors from Bingham and Garfield are unanimous in their expressions in regard to the successful operation of the Boston Consolidated milling plant. and that the average saving is hitting to the leaf of the new exchange, subject to the control and disposition of the board of governors when the organization, and that there is a much better to the new exchange, subject to the control and disposition of the board of governors when the organization, and that there is a much better are now in complete and stendy opera-tion, and that there is a much better tonnage of porphyry ores coming from the mine. It begins to look as if the company has shut down the giving out of all news relative to the mine and mill until the hour arrives when every-thing can be pronounced the absolute success which the majority of western people believe is a logical conclusion to the enterprise.

Mining Notes.

G. L. Bemis, general manager of the Union Chief company, has returned from the property.

J. Fewson Smith, engineer of mines for the United States company, was in Bing-ham Saturday on company business. It is reported from Mercur that the Boston Sunshine mill is running full blast and in a very satisfactory manner. General Manager Colin McIntosh of the Ohio Copper company says that he will have a large crew of men at work Mon-day, placing the mill in stage.

E. C. Coffin superIntendent of the Lower Mammoth company, attended the board meeting yesterday. The shaft is lifty feet below the 1200 level. From the Seven Troughs camp on Sat-urday came the news that the 110-ton run of Harris lease ore has netted \$5070. Another run soon is to be made.

General Manager Grant Snyder reports the new compressor of the Cliff company at Ophir installed and operating success-fully. This powerful piece of equipment will permit much better progress here-after in development.

E. J. Raddatz, general manager of the Finite Standard company, on returning from the property resterday brought with from the property yesterday brought with him some rich samples of ore from a raise from the 425-foot level. Mr. Rad-datz says the management is close to the ore-body making portion of the proper-ty, and he is much pieased with the con-ditions in the mine. Assay returns on the ore displayed by Mr. Raddatz were 70 per cent lead, 16.8 ounces silver, and 80 cents gold.

Say, Mr. Investor!

WE HAVE BEEN TELLING YOU ABOUT THE OPPORTUNITY OF BUYING TREASURY

Sunnybrook Coal & Coke Co. AT 25 CENTS PER SHARE—Well, the Allotment is Almost Gone

IF YOU WANT TO SHARE IN OUR PROSPERITY YOU MUST ACT NOW. Our property holdings are over 800 acres of rich coal land in Carbon county and the mine is

shipping NOW.

This sale of stock is for the purpose of further equipping the property and increasing the

The physical condition of the mines at this time warrants us in saying that this stock is NOW worth PAR. We mean by this that for every share of stock issued there is ONE DOLLAR'S worth of property back of it. When the added equipment is installed and the shipments begin for the winter the stock WILL GO to par. This alone will make you a net profit of 75 cents per

share. With the payment of the first dividend it will be much higher. Experts pronounce our coal of the highest quality, and consumers who have used it will use no other. One dealer in Goldfield, Nev., sold Sunnybrook coal last winter at \$18 per ton, which was \$3 more than asked for any other coal. There is a reason for this. That reason is that our coal gave more heat, lasted longer and contained less ash than any other coal.

The company has no difficulty in disposing of its product—the difficulty lies in producing enough coal for the demand, which is not possible with the present equipment.

Shipments of only 250 tons daily is sufficient to pay dividends of 18 per cent on the issued stock. We want to maintain shipments of 1000 tons daily. It is for the purpose of adding this necessary equipment that this stock is placed on the market at 25 CENTS PER SHARE. You can buy in any amount from 100 shares up; preferably not more than 1000 shares to one person, as a large list of stockholders makes a large list of consumers.

This IS NOT a speculation, but an INVESTMENT. We advise IMMEDIATE purchase of this stock, for this offer will not stand very long; the allotment being small it will be taken

The officers of the company are among the most successful and best known business men of the city. You are safe when associated with them in business.

STRONG BOARD WILL THREE DIVIDENDS ON HEAD NEW EXCHANGE

Selection of Directors Discloses Prominent Talent Back of Enterprise.

The complete organization of the Utah Stock and Mining exchange will be perfected as soon as the new rooms can be made ready for a meeting, which will be in a few days.

A good many applicants have ready paid their subscription, and a large number of others have placed ship. The board of directors, or governors, will consist of nine members, who are prominently identified with the larger mining interests of Utah.

David Keith will be president of the Grant Ezra Thompson, Windsor V. Rice, James D. Murdock and F. J. West-cott of Salt Lake City, John P. Creer cott of Salt Lake City, John P. Creer of Payson and Joseph Berry of Provo as the remaining directors. These gen-ilemen will constitute the strongest tlemen will constitute the strongest board of governors that could be de-

A short time limit has been fixed for securing seats at the organization price of \$200 each, and it is certain that at least 125 paid subscriptions for membership will be in hand by the 20th. after which date the price will be in-

Inquiries and reservations are coming in daily to C. W. Hartley, who has the promotion of the new exchange in hard. All money received for seats is immediately deposited in the bank to the credit of the new exchange, subject

ators are becoming interested is the best evidence that the new exchange will e a permanent and powerful factor in Utah's mining development and stock sales. As the name indicates, this exchange will be a state-wide institu-tion, on which members from the va-rious mining centers will operate.

S. D. Evans, Undertaker and Embalmer, has removed to new location, 48 South State.

SATURDAY AT PROVO

Colorado, Iron Blossom and Sioux Decide on Profits for Current Month.

pecial to The Tribune.

PROVO, April 10.-Three mining companies rewarded the expectations of stockholders this afternoon by posting substantial dividends for the current month. Colorado, by virtue of amount to be paid per share, and the number of shares outstanding, will distribute their names on the list for member- the highest profits of the three, having posted 8 cents a share, or \$80,000. The Iron Blossom came forward with its maiden effort, and agreeably to expecta tions, posted 8 cents a share, or \$72, 000, demonstrating the ability of the new exchange, with David Evans, B. F. company to earn big money in a very

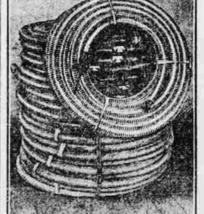

> While the Sioux Consolidated com-pany-did not hoist its dividend back pany-did not hoist its dividend back to 8 cents a share, it came jolly near it. The directors, as predicted this week by General aMnager Loose, decided that 7 cents a share would be sufficient instead of 5, which latter amount prevailed last month, although the March earnings would have allowed an 8-cent dividend without much trouble. But by paying 7 cents a share, the Sioux will be able to lay aside a ble. But by paying 7 cents a share the Sioux will be able to lay aside a comfortable nest-egg, which, by growing during the successful months, wil provide a substantial emergency fund against the rainy day like that of last February. This dividend also is payable on April 20, the books closing on the 15th, the amount being \$52.
